

Stalking Magic

System Change Accelerator

Making complex systems more prone to Magic

THREE MOUNTAIN GROUP

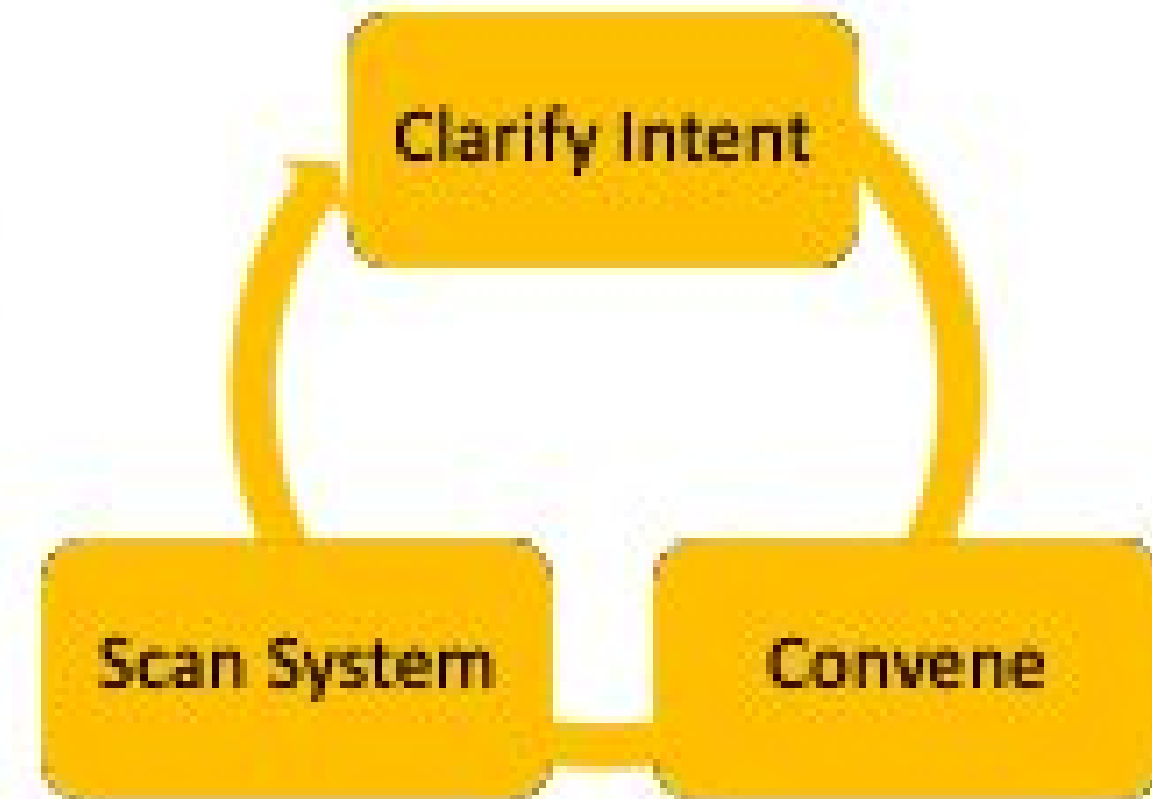

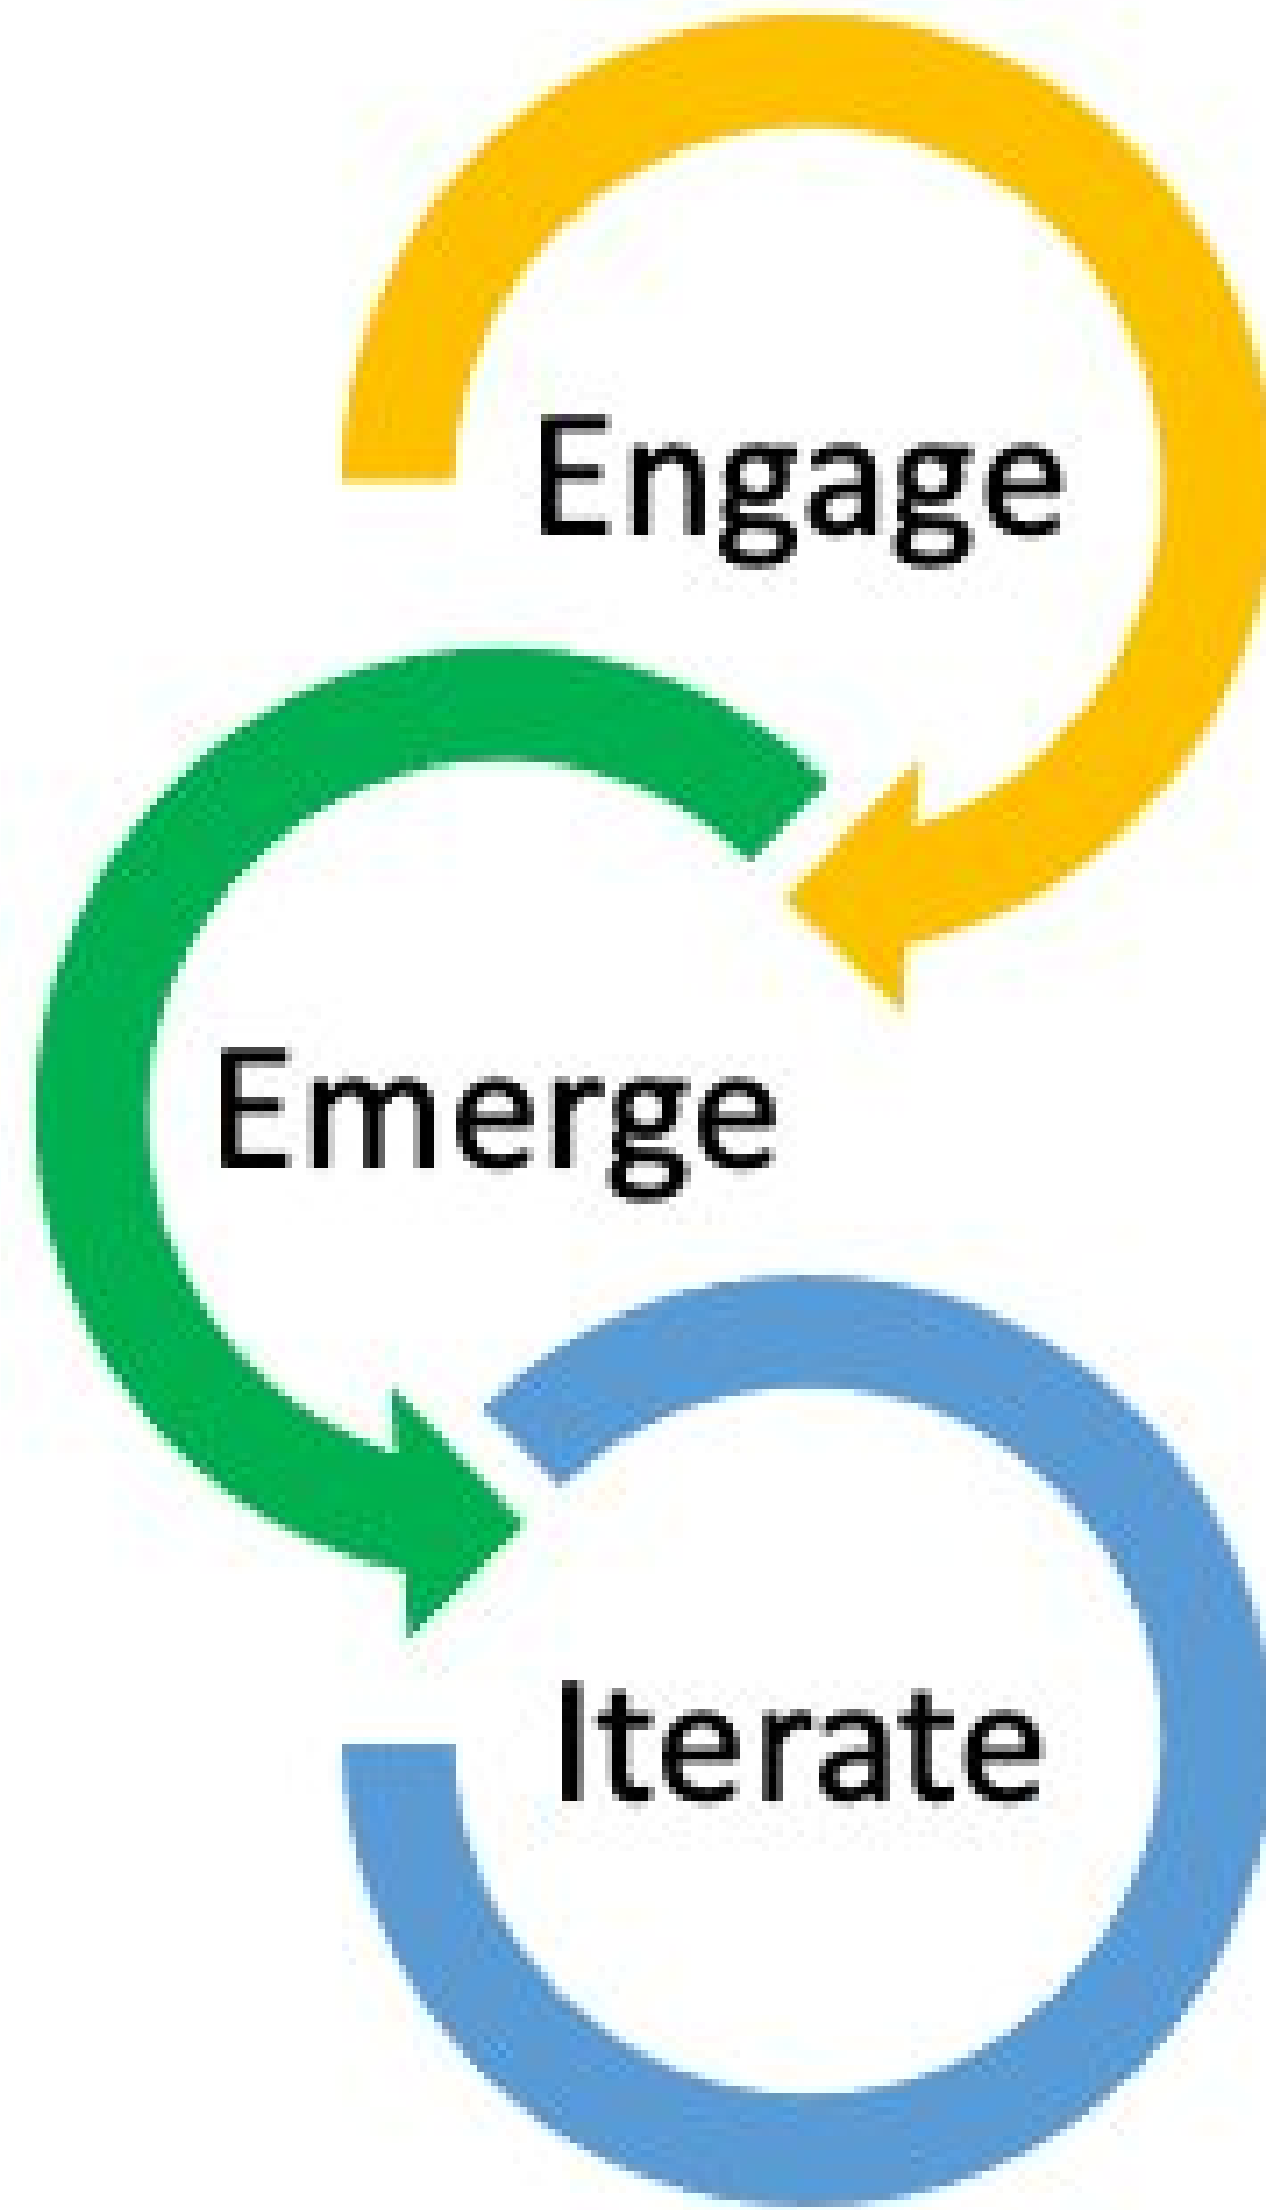

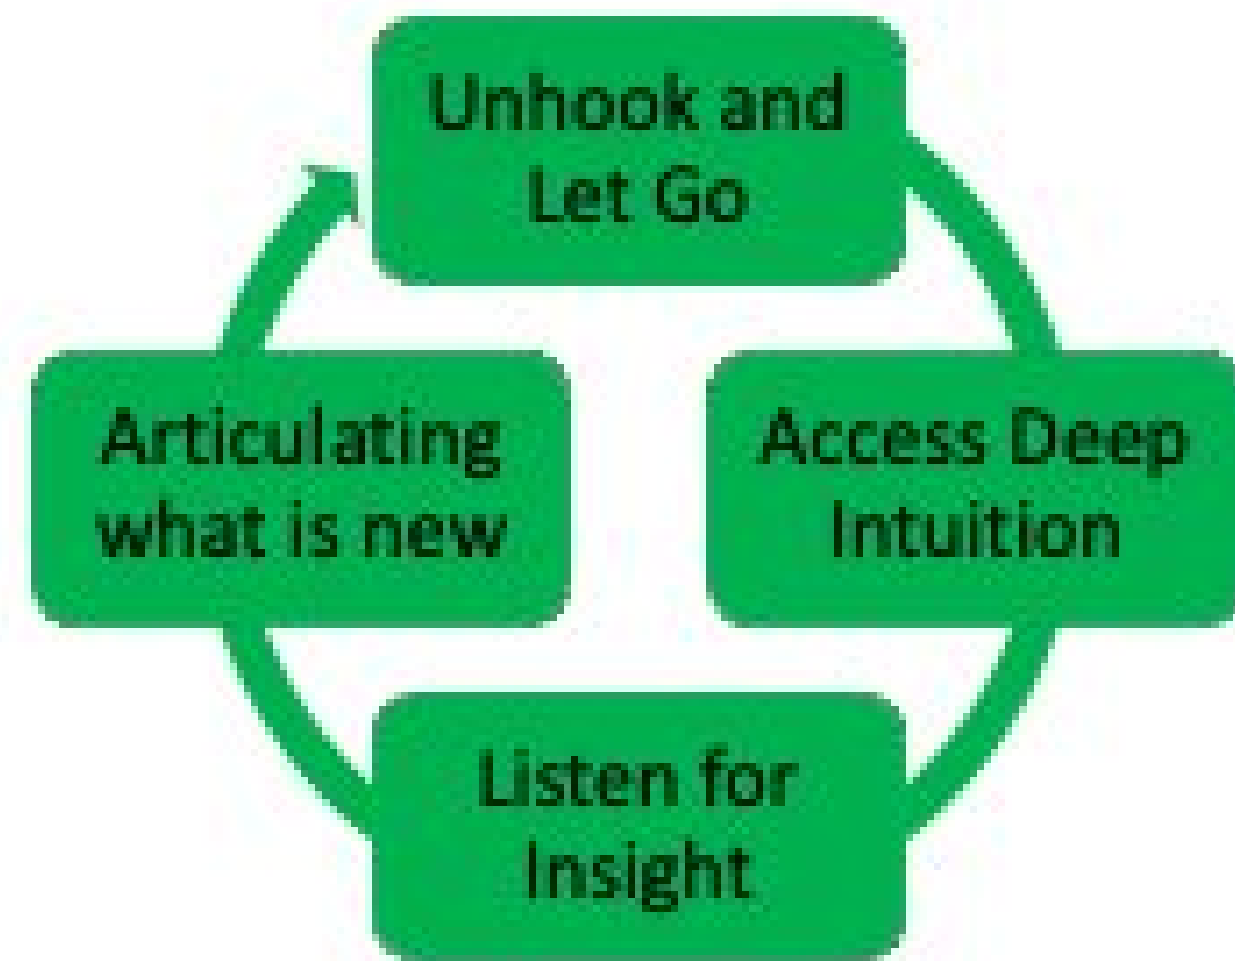

➔ What is Stalking Magic?

A collaborative process - proven over 30 years - to make complex systems more prone to magic, allowing great breakthroughs to arise in previously intractable situations.

An elegant 3-step dance....

Stalking Magic Revealed

Why Stalking Magic Works

1. Begins with those passionate and interested and engenders deep engagement and commitment
2. Gets the “right people” in room - especially unusual suspects - to see the system differently
3. Rapid cycle prototyping, to try solutions out, experiment, get real world feedback, and iterate your way into bigger solutions and greater impact

Why Stalking Magic Works

4. Creative thinking - leverages deep intuition and “on the balcony” insights to see what levers might shift the system most critically
5. Very tangible and practical - identifies a handful of specific high leverage action areas and the “one next thing” needed to move things forward
6. Creates Hope and Optimism that dramatic change does happen.
